(54) System and method for retrieving customer information at a transaction center

(57) A method and system for gathering and storing customer profile data when the customer accesses a website location. Dynamic content messages from company marketing material are selected in accordance with the profile data and used to provide a customized webpage to the customer. In addition, a customer service representative can provide real-time updates to the customized webpage when the customer contacts a customer service representative to place a product or service order.

FIG. 1
